TECHNICAL SKILLS:

- JavaScript
- Node.js
- MongoDb
- Express.js
- REST API
- HTML5/CSS3
- React
- Redux
- Git
- React Native
- PHP

SOFT SKILLS:

- Calm
- Positive
- Cheerful
- Sporty

LANGUAGES:

- Ukrainian – native
- English - Intermediate

SUMMARY:

I want to develop and work on interesting projects. FullStack development is interesting, it's nice when you control both sides of the WEB-Application. Took part in the implementation of educational projects, was engaged in Back-End (Node.js) and Front-End (React.js).
At the time I want to deep into Back-End development using Node.js.

PROJECT EXPERIENCE:

Project: **Slim-mom** (*https://slimmom-frontend-2kh.netlify.app/*)

Technologies: React.js, Redux, Node.js, Express.js, MongoDB, mongoose.

About the project: *no-commerce project (as examine in GoIT). The project was created for girls who want to lose weight.*

Project: **Holiday-find** (*https://holidayfind.de/*)

Technologies: React, Redux,

About the project: *Search place/hotel for holiday.*

Project: **iMatrix-App**

(*https://play.google.com/store/apps/details?id=com.imatrixapp&hl=en&gl=US*)

(*https://apps.apple.com/us/app/imatrix-app/id1631868655?platform=iphone*)

Technologies: React Native, React, Redux,

About the project: *https://imatrixsys.com/ Application for monitoring BLE devices by GATT*

Project: **Dream Stone (***https://www.dreamstone.com***)**
Technologies: server-side rendering PHP (twig), admin panel wrote on React, Redux

About the project: *Online jewelry store*

Have experience in:
- working with Shopify Application,
- integration Twilio SDK.
